Sevan Jewelry

Marketing Operations Specialist

Led a 10-person testing squad; bug-tracking workflows on pre-release titles.
Learned the technical floor of how games actually ship.

Built esports-stakeholder relationships; ROI frameworks for professional players.
First commercial muscle.

Digital campaigns supporting 100+ sales; community growth across non-gaming verticals.
Adjacent rep at brand & ops.

Range, accumulated. QA → BD → Marketing → Operations → Strategy.

How I work.

01 Defensibility over speed.

Every rate, every recommendation, every commercial position should trace back to a source. If I can't show the math, I haven't done the work yet.

02 Methodology, then motion.

Build the engine first — the rate book, the playbook, the framework. Then ship at speed. Without methodology, fast becomes expensive.

03 Half technical, half commercial.

Writing SQL, designing pricing logic, and closing six-figure deals are the same job. The product is whatever the client buys, end-to-end.

The stack I work in.
